QUARTERLY ACTIVITIES REPORT

31 December 2015

PROJECTS

SC6 (Cadlao) - Cadlao Oilfield Re-development Project, the Philippines

Peako's interests in relation to the SC6 Cadlao Oilfield re-development project are held through its subsidiary Peak Oil & Gas (Australia) Pty Ltd (Peak) and are as follows:

1. A 25% Cadlao joint venture interest (held in trust by Cadlao Development Company Limited (Cadco)) or, alternatively, an entitlement to receive \$6.7 million as consideration for the buyback of the 25% interest (see Cadco Buyback Right on page 4); and
2. A prospective indirect economic interest held by way of a 40% shareholding held by our subsidiary, Energy Best Limited (EBL), in VenturOil Philippines Inc (VenturOil) (itself a 20% interest holder in the Cadlao Joint Venture) and a 5% interest in the Service Contract SC6 Cadlao held by VenturOil in trust for EBL. The 40% shareholding and subsequent associated funding obligation was intended to provide EBL with 75% dividend rights in respect to its 40% shareholding.
3. An aggregate 80% interest in overriding royalty interests relating to 3.3% of production held by Peak Royalties Limited
4. A loan receivable from VenturOil for US\$736,188

SC6 Cadlao – project history and overview

The SC-6 Service Contract, located in the Palawan Basin, offshore the Philippines, was granted on 1 September 1973. The Cadlao Oil Field, which is located within the SC6 contract area, was discovered by Amoco in 1977. Between 1981 and 1991, 11.1 MMBBLs of oil was produced, based on sparse 2D seismic. The field was shut-in in 1991 in response to declining production, low oil price and escalating costs.

In 1996, 3D seismic data was acquired over the permit as part of a regional 'spec' 3D seismic survey. Interpretation of this seismic data identified additional 2P reserves of 6MMBBL (Gaffney Cline & Associates estimate) up-dip from the Amoco wells.

A 100% interest in the Cadlao permit acreage was secured by Blade Petroleum Philippines Ltd (BPPL) (now Cadco) from local interests in 2007 and 2008. BPPL assumed operatorship and acquired and remapped the 3D seismic recorded earlier to define up-dip structural potential for the field. BPPL subsequently transferred a 20% interest in SC6 Cadlao to VenturOil.

Figure 1 SC6 Location Map

The proposed Cadlao oil project is a redevelopment project in shallow water (c.20m water depth). It is intended to be developed via drilling and production from a jack-up drilling rig with export of crude to a moored vessel.

SC6 Cadlao –Peak’s interests and involvements

In 2010, Peak entered a Farmin Agreement with BPPL, pursuant to which Peak would earn a 50% interest in SC6 Cadlao. An initial 25% was earned by satisfaction of certain conditions precedent and is held on trust for Peak by BPPL (now named Cadco). The further 25% was to be earned upon Peak securing funding for the development. In 2012, BPPL sought to terminate the Farmin agreement for noncompliance by Peak with the funding obligation provisions of the Farmin agreement. Peak disputed the validity of the termination and litigation and arbitration proceedings ensued. Arbitration proceedings are currently in abeyance. This interest is subject to a “Buy-back Right” – see below.

Prior to 2012, Peak also acquired an aggregate 80% interest in overriding royalty interests relating to 3.3% of production.

Peak, through a subsidiary, also acquired a prospective economic interest in SC6 Cadlao through a shareholding in VenturOil. The interest in VenturOil was effected through the acquisition of EBL, a 40% shareholder in VenturOil, from Clove Capital Partners Limited. Peak’s subsidiary, Peak Singapore, is obliged to pay further consideration of US\$2.8 million to Clove Capital Partners from the first two oil liftings, provided that Peak Singapore retains its economic interest in the Cadlao Project via VenturOil, unless it has lost that interest by virtue of gross negligence.

A subsequent agreement was entered into between EBL and VenturOil relating to the funding of VenturOil’s 20% interest. This involved a pre-condition requiring a variation allowing EBL’s 40% shareholding in VenturOil to provide 75% dividend rights in lieu of 40% dividend rights in return for which EBL is required to fund VenturOil’s 20% share of development costs of the Cadlao Project. VenturOil is obligated to reimburse these costs to Cadco following the “spudding” of the first development well.

EBL also has the right to a 5% interest in SC6 Cadlao, held in trust for it by VenturOil, to be carved out of VenturOil's 20% interest.

In addition, Peak and its subsidiaries have lent VenturOil US\$736,188 (A\$954,672) as shareholder loans. There is uncertainty regarding the practical ability of Peak to recover these funds.

In February 2015, VenturOil claimed to terminate unspecified agreements between VenturOil and Peak on the basis that Peak is in breach of non binding "pre-funding obligations" in favour of VenturOil. Peak is of the firm opinion that neither it, nor any subsidiary of it, is in breach of any obligation under any binding agreement with either VenturOil or its related entity, Figurado Energy Investment Holdings, and that there are no grounds for termination of any binding agreement.

Cadco Buyback Right

As a result of the termination of the farmin agreement with BPPL (now Cadco), Peak has a right to receive buy-back funds of \$6.7million from Cadco. In May 2012, BPPL (now Cadco) gave notice to Peak of termination of the farmin agreement and in so doing, exercised the "buy-back" remedy under the farmin agreement. Pursuant to the farmin agreement, that remedy is for Cadco to pay the "Buy-back Price" (\$6.7 million) to Peak to buy back Peak's 25% working interest, held in trust by BPPL.

Peak has previously agreed terms for settlement of the Buyback Right with Cadco, with a final form of settlement agreement having been negotiated on a number of occasions, and in July 2014 a settlement agreement was executed. Cadco failed to make payment of the settlement amount under the settlement agreement. Peak accordingly recommenced arbitration action and is presently considering its options in relation to recovery actions in relation to the Cadco Buy-back Price.

SC6 Cadlao Project Status

Following the termination of the Peak farmin, in 2012 BPPL entered into funding agreements with Viking Energy Philippines Limited (Viking) at the corporate level with Viking joining Blade Petroleum Limited (Blade) as a shareholder in BPPL. BPPL then changed its name to Cadlao Development Company Limited (Cadco). Cadco assumed Operatorship of the Joint Venture and Viking assumed funding responsibility. Project funding from Viking has not eventuated and Peak understands that the ownership and control of Cadco is now subject to material dispute between Blade and Viking, neither in any way related to Peak.

Given the multi-dispute nature of both the Cadco interest and the VenturOil interest, Peak is presently not receiving copies of Department of Energy communication relating to SC6 Cadlao.

Peako has appointed SyCip Salazar Hernandez & Gatmaitan as Filipino counsel to advise and assist in relation to the VenturOil interest.

During the quarter Peako commenced cooperative discussions with joint venture participants in an effort to resolve the multi-layered disputes in relation to SC6.

Minerals Exploration Interests – Western Australia

Peako has had applications afoot for a number of years over four Exploration Licences in the area of Sunday Creek and Mount Sears in the Rudall River area of the Paterson region of Western Australia. The Paterson region is well known for its uranium potential, hosting Australia's fifth largest uranium deposit at Kintyre. Uranium occurrences are known in both the Sunday Creek and Mount Sears prospects. Both prospects are polymetallic, containing copper and lead.

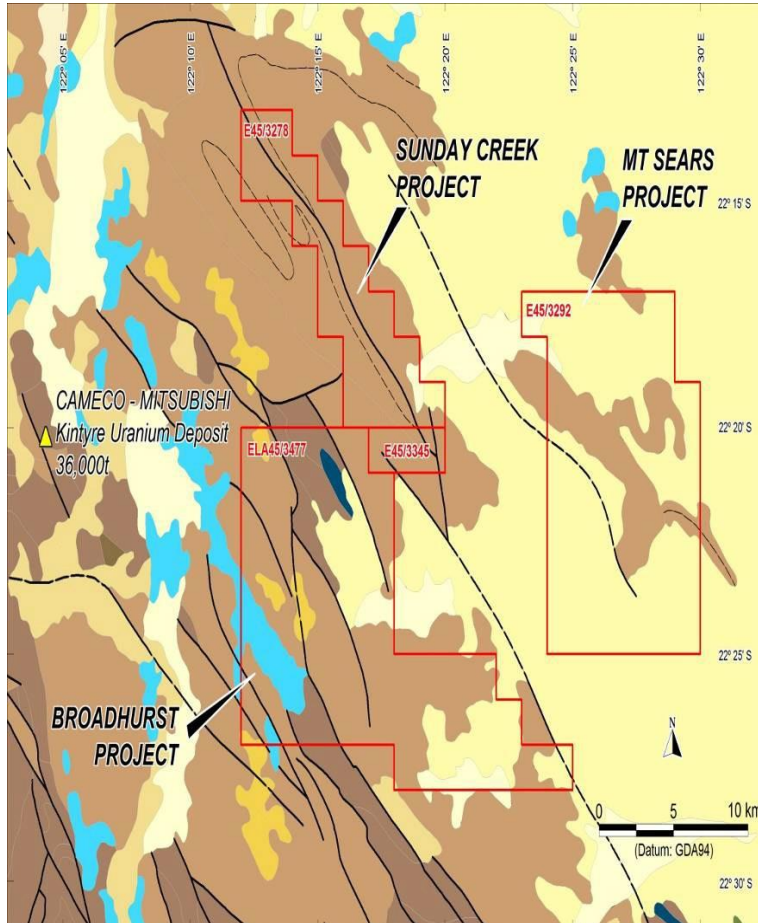

Figure 3 Peako Minerals Exploration Interests

Peako's 100% interest in the applications is shown in Table 1.

Prospect name	Tenement No	Size (km ²)	Application date
Sunday Creek	ELA45/3278	60.80	30 July 2008
Sunday Creek	ELA45/3345	9.60	15 December 2008
Broadhurst	ELA45/3477	182.40	10 August 2009
Mt Sears	ELA45/3292	150.40	30 June 2008

Table 1 Minerals Exploration Interests

The Sunday Creek and Mount Sears areas were first explored between 1978 and 1981. Exploration activities at Sunday Creek included geochemical sampling, field mapping, airborne and ground magnetic and radiometric surveying, 6 percussion holes for a total of 489 metres and 11 diamond holes (704 m in total). All but one (drill hole BR 8) are located within the applications.

The Sunday Creek Prospect was identified as a radiometric anomaly, with subsequent rock chip samples containing up to 7% U, 1.12% Pb and 0.85% Cu. Other radiometric anomalies were also followed up with soil geochemical surveys, which produced low assay responses

mainly due to sand cover. Several weak anomalies were identified. Rock chip samples along the contact produced elevated copper and uranium responses and several of these anomalies were drilled, returning several mineralized intersections.

Reconnaissance drilling was done at very wide spacing of 4km (BR-5, 7, 9, 10) and the prospective contact of 20km strike length remains largely untested, with only four drill holes completed. In addition, drill holes were generally shallow and possibly positioned outside the main target zone.

The lack of high resolution data available at the time (1978-1981) resulted in extremely limited structural interpretation by previous explorers. Also, the geological knowledge and the prospective validity of the region for uranium mineralization have increased considerably since the finding of the Kintyre uranium deposit in 1985 by CRA Exploration Pty Ltd (now Rio Tinto) and now operated by Cameco Corporation.

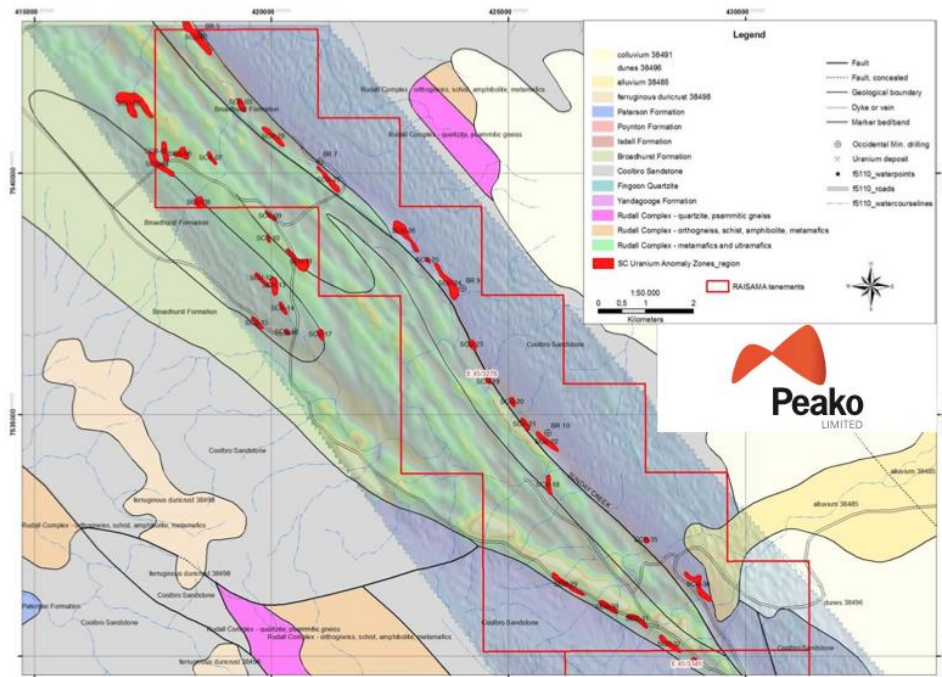

Figure 4 Sunday Creek Exploration Licence 45/3278 Application Area

E45/3278, is currently being assessed for expedited approval and the Company is engaged in the Native Title consultation process.

CORPORATE

During the quarter, the Company successfully restructured its debt with Octanex of \$1,284,744, which was otherwise due for repayment in June 2016, (Octanex Loan). The Octanex loan has been converted into a proceeds-sharing arrangement whereby Octanex will share in any proceeds that Peak receives in connection with any of its Cadlao interests.

The Company also changed its name to Peako Limited, proposed by the Board in order to avoid any association with the now-discredited term “peak oil” (as in “peak world oil production”), to shorten the name in order to develop the corporate brand “Peak” and to maintain the name in keeping with its ASX code PKO.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
